
Poster Session I: Thursday, October 11**1. ERN in Attention-Deficit Hyperactivity, Oppositional-Defiant, Reading, and Math Disorder**

Andrea Burgio-Murphy¹, Rafael Klorman¹,
Joan Thatcher¹, Sally Shaywitz², Jack Fletcher³,
Karen Marchione², John Holahan², Karla
Stuebing³, & Bennett Shaywitz²

¹University of Rochester, ²Yale University, ³University
of Houston

2. Startle reflex, ERP responses, and image content during affective picture processing in posttraumatic stress disorder (PTSD)

Mark W. Miller, Matthew O. Kimble, Brett T.
Litz, Jennifer L. Greif, Julie L. Wang, &
Allison M. Forti

Veterans Affairs Boston Healthcare System

3. A startle reflex examination of emotional responding in posttraumatic stress disorder (PTSD)

Mark W. Miller, Brett T. Litz, Jennifer
L. Greif, & Julie L. Wang

Veterans Affairs Boston Healthcare System

4. The late positive potential in response to emotional in- and out-group faces

Pearl Chiu, Nalini Ambady, & Patricia Deldin
Harvard University

5. Memory biases in depression: Slow-wave processing during encoding and retrieval

Avgusta Shestyuk, Patricia Deldin, Jordan
Brand, & Christen Deveney

Harvard University

6. Visual EEG synchronization deficits in schizophrenia

Marcia A.B. Wilt, Brian F. O'Donnell, Paul H.
Lysaker, & Thomas A. Busey

Indiana University

7. Differences in heartbeat perception are reflected in the amplitude of the heartbeat evoked potential

Olga Pollatos & Rainer Schandry

Ludwig-Maximilian University, Munich

8. **The autonomic psychophysiology of aggressive, antisocial, and psychopathic behavior: A meta-analysis**
Michael F. Lorber
State University of New York, Stony Brook
9. **EEG coherence and psychomotor efficiency in expert and nonexpert marksmen**
S. Deeny¹, C. Hillman², C. Janelle³, & B. Hatfield¹
¹University of Maryland, College Park, ²University of Illinois, Urbana-Champaign, ³University of Florida
10. **Effects of sound duration on distinguishing concurrent auditory events as evidenced by event-related brain potentials**
Benjamin M. Schuler¹, Kelly McDonald², & Claude Alain²
¹University of Toronto, ²Rotman Research Institute at Baycrest Centre
11. **Disinhibition and risk for drug abuse: Amphetamine effects on auditory P300**
Frances H. Gabbay^{1,2}, Connie C. Duncan^{1,2}, Erin K. Morris¹, & Allan F. Mirsky^{1,2}
¹Uniformed Services University of the Health Sciences, ²National Institute of Mental Health
12. **EEG Evidence for sensing unperceived odors using precision air dilution olfactometry**
John P. Kline, Martin Kendal-Reed, Daniel P. Evatt, Alison F. Hood, & Kelley Knapp-Kline
Florida State University
13. **Neuroticism predicts variability in frontal EEG asymmetry**
Jennifer A. Minnix & John P. Kline
Florida State University
14. **A multi-level analysis of drinking's appetitive motives and consequences**
John P. Kline, Keith F. Donohue, & Alan R. Lang
Florida State University
15. **Evidence for dissociation of basic reactivity and early cortical processing in defensiveness**
Steven D. LaRowe & John P. Kline
Florida State University

- 16. Left frontal EEG activation and evidence for a compensatory B process**
Ginette C. Blackhart¹, William C. Williams², & John P. Kline¹
¹*Florida State University*, ²*Eastern Washington University*
- 17. Salivary cortisol and startle reactivity**
K. I. Mathis, D. M. Quadagno, S. D. Larowe, & J. P. Kline
Florida State University
- 18. Don't frown into your drink: Low corrugator EMG during drinking predicts self-reported stimulant effects of alcohol**
Keith F. Donohue, John P. Kline, & Alan R. Lang
Florida State University
- 19. Alcohol effects and individual differences in the Eriksen flanker task**
Melanie A. Pearson¹, Bruce D. Bartholow², Gabriele Gratton³, & Monica Fabiani³
¹*University of Missouri, Columbia*, ²*University of North Carolina, Chapel Hill*, ³*University of Illinois, Urbana-Champaign*
- 20. Effects of interstimulus delay on the mismatch negativity in young and older adults**
Kathy A. Low¹, Emily Wee¹, Jeffrey J. Sable¹, Gabriele Gratton², & Monica Fabiani²
¹*University of Missouri, Columbia*, ²*University of Illinois, Urbana-Champaign*
- 21. Hemispheric organization of visual memory: Masking studies**
G. Gratton¹, A. J. Sarno², & M. Fabiani¹
¹*University of Illinois, Urbana-Champaign*, ²*University of Missouri, Columbia*
- 22. Levels of processing effects on memory encoding and retrieval: An ERP mapping study**
Ray Johnson, Jr., Jack Barnhardt, Steven Grossman, Neil Adler, & Deena Schindler
Queens College, City University of New York
- 23. The effect of repetition on deception-related ERP activity**
Ray Johnson, Jr. & Jack Barnhardt
Queens College, City University of New York

- 24. It's the product! Risky words and pictures increase attention, arousal, and memory**
Annie Lang, Seungwhan Lee, Yongkuk Chung, & Xiaoquan Zhao
Indiana University
- 25. The effect of the presence and pacing of dialogue in radio messages on tonic attention**
Robert F. Potter
University of Alabama
- 26. The effects of product display in print ads on arousal**
Amber Coral-Reaume Miller, Paul D. Bolls, & Ninali Garza
Washington State University
- 27. Orienting to text on screen: Medium or task?**
Annie Lang, Yongkuk Chung, Seungwhan Lee, & Jennifer Borse
Indiana University
- 28. Physiological and emotional responses to first person shooter video games**
Annie Lang¹ & Edd Schneider²
¹*Indiana University*, ²*East Stroudsburg University*
- 29. Gamma band EEG and the P300**
Sidney J. Segalowitz & James Desjardins
Brock University
- 30. Heart rate variability, event-related potentials, and attentional control in older and younger adults**
Karen Mathewson¹, Jane Dywan¹, Sidney J. Segalowitz¹, Andrea Arseneault¹, Wilma Veenhof², & Rupa Parakh²
¹*Brock University*, ²*University of Waterloo*
- 31. Separating vigilance and motor preparation in the CNV**
Sidney J. Segalowitz¹ & Patricia L. Davies²
¹*Brock University*, ²*Colorado State University*
- 32. Patterns of electroencephalographic activity in adults with a history of childhood-onset depression during a state of induced anxiety**

Kirsten M. VanMeenen¹, Jeffrey F. Cohn²,
Anita Miller², Nathan A. Fox¹ & Maria
Kovacs²

¹*University of Maryland*, ²*University of Pittsburgh*

33. Physiological reactivity and impulsive aggression

Nicole R. Villemarette-Pittman, Matthew S.
Stanford, & Rebecca J. Houston
University of New Orleans

**34. Event-related evidence of word fragment
priming: A new correlate for language
processing?**

Claudia Friedrich, Sonja A. Kotz, & Thomas C.
Gunter
Max Planck Institute of Cognitive Neuroscience

**35. Reduced interhemispheric transmission time
in schizophrenic patients**

Tanja Endrass¹, Bettina Mohr^{1, 2}, Hans Watzl¹,
& Brigitte Rockstroh¹
¹*University of Konstanz*, ²*Medical Research Council,
Cambridge*

**36. Neuropsychological correlates of subordi-
nate homograph disambiguation**

Carlye B. Griggs, Martha E. Shenton, Robert
W. McCarley, & Dean F. Salisbury
Harvard Medical School & McLean Hospital

**37. Can differences in fatigue be reflected by
differences in tonic EMG corrugator
supercilii muscle activity?**

Ingrid J. T. Veldhuizen¹ & Anthony W. K.
Gaillard^{1,2}
¹*Tilburg University*, ²*TNO Human Factors*

**38. Visual selective attention and aging: A
behavioral and ERP study**

Cornelia Kranczioch, Monica De Filippis, &
Sonja A. Kotz
Max Planck Institute of Cognitive Neuroscience

39. Binocular rivalry effects may begin as early as V1

Carmen de Labra¹, Steven A. Hackley²,
Gabriele Gratton², & Fernando del Valle-
Inclán¹
¹*University of La Coruña*, ²*University of Missouri,
Columbia*

- 40. Objective quantification of motor incoordination in populations at risk for schizophrenia**
Anne-Lise V. Wolff¹, Gillian A. O'Driscoll^{1,2},
Douglas Shiller¹, Tal Savion-Lemieux¹, &
David J. Ostry¹
¹McGill University, ²Douglas Hospital Research Center
- 41. Ascorbic acid treatment decreases reactivity to stress: A randomized trial**
Stuart Brody, Ragnar Preut, Kerstin Schommer, & Thomas H. Schurmeyer
Center for Psychosomatic and Psychobiological Research
- 42. Vaginal intercourse frequency and heart rate variability: Replication and extension**
Stuart Brody & Ragnar Preut
Center for Psychosomatic and Psychobiological Research
- 43. Emotional awareness is associated with more rapid blood pressure recovery from stress**
Ragnar Preut & Stuart Brody
Center for Psychosomatic and Psychobiological Research
- 44. Nicotine improves attention and eye movement performance in schizophrenia**
Lana Depatie, Gillian A. O'Driscoll,
Anne-Lise V. Wolff, Victoria Atkinson, Joseph Thavundayil, N Ng Yin Kin, & Samarthji Lal
McGill University
- 45. Separating the contributions of novelty and familiarity to the metamemory mismatch effect associated with semantic retrieval errors**
Brady Butterfield & Jennifer A. Mangels
Columbia University
- 46. On the correlation between P300 from visual stimuli and cognitive performance in older people**
Günes Yücel & Frederick Travis
Maharishi University of Management
- 47. Frontal EEG asymmetries in individuals with low and high levels of depression**

Don Pacheco, Richard Brown, & Mark W. Geisler

San Francisco State University

48. Frontal EEG asymmetries associated with learning and music

Mark W. Geisler, Emma Beck, Kelli Mathews, Melissa Hirt, & Rachel Nardo

San Francisco State University

49. Fatigue, EEG activity and cognitive performance

Claudine Catledge, Jeri Acock, Katie Pohl, & Mark W. Geisler

San Francisco State University

50. The startle response as an indicator of potential alcoholism

Virginia F. Saunders, Ryan L. Wall-O'Mara, Scott L. Pytlik, Amy L. Alpert, Allegra Riley, Carrie Warto, & Mark W. Geisler

San Francisco State University

51. Music vs. verbal script induction of self-generated emotion: Differences in hemispheric EEG activation

Jennifer N. Alfaro, Susan AtLee Daugherty, & Helen J. Crawford

Virginia Polytechnic Institute and State University

52. Selective attention to color and speed: A view from event-related potentials

Amy M. Jensen, Bernice Kaufman, & Joseph Dien

Tulane University

53. Acute mental challenge reduces nociceptive flexion reflex in both men and women

Karen L. Petersen¹, Mustafa al'Absi¹, Christopher France², & Lorentz E. Wittmers¹

¹*University of Minnesota School of Medicine,*

²*Ohio University*

54. Neural response to modulated auditory stimuli in schizophrenia

C.A. Brenner¹, M.A. Wilt¹, P.H. Lysaker², & B.F. O'Donnell¹

¹*Indiana University, Bloomington,*

²*Roudebush Veterans Administration Medical Center, Indianapolis*

55. Using ambulatory PCO2 feedback as a therapeutic intervention for panic disorder

Alicia E. Meuret, Frank H. Wilhelm, & Walton T. Roth
Stanford University

56. Differential effects of room lighting on reaction time and heart rate in adults with and without Attention Deficit Disorder

Erin Richardson, Michael Concannon, Meera Daroy, Jennifer Harrington, Kathryn Hope, Caroline Pappert, Erica Petrazzuolo, Thomas Randle, Shannon Raybuck, Rebecca Thomas, Michael Vraneza, Miriam Walls, Amanda Williams, & Dennis McClain-Furmanski
Virginia Polytechnic Institute and State University

57. Psychophysiological response patterns during recall of traumatic life experiences differ with the magnitude of the psychological trauma

Maggie Schauer¹, Frank Neuner¹, Walton T. Roth², & Thomas Elbert¹

¹*University of Konstanz & Center For Psychiatry, Reichenau*, ²*Stanford University & Palo Alto Veterans Affairs Medical Center*

58. Word length and frequency in early lexical access: Neuromagnetic evidence

Ramin Assadollahi & Friedemann Pulvermuller

University of Konstanz & Medical Research Council, Cambridge

59. Signatures of syntactic processing in the neuromagnetic mismatch field

Ramin Assadollahi & Friedemann Pulvermuller

University of Konstanz & Medical Research Council, Cambridge

60. Altered hemispheric asymmetry of functional auditory organization in children and adolescents with dyslexia

Sabine Heim, Carsten Eulitz, & Thomas Elbert

University of Konstanz

61. Coherent activity of steady-state-response in speech perception: A MEG study

Markus Härle, Andreas Keil, Christian
Wienbruch, Thomas Elbert, & Brigitte
Rockstroh
University of Konstanz

**62. Cortical mapping of vowels reflects their
spectral and phonological properties**

Jonas Obleser¹, Carsten Eulitz¹, Michaela
Schlichtling¹, Eugen Diesch², Aditi Lahiri¹, &
Thomas Elbert¹

¹*University of Konstanz*, ²*Zentralinstitut für Seelische
Gesundheit, Mannheim*

**63. Within-subject reproducibility of the cortical
representation of phonological features in
vowels**

Carsten Eulitz, Jonas Obleser, Michaela
Schlichtling, & Aditi Lahiri

University of Konstanz

**64. Electrical shocks to the arm elicit and inhibit
pain and startle eyeblink**

Terry D. Blumenthal¹ & Charles D. Swerdlow²

¹*Wake Forest University*, ²*University of California,
Los Angeles*

**65. The effects of prepulse and distraction on
pain and startle caused by electric shocks**

Scott M. Duncan & Terry D. Blumenthal

Wake Forest University

66. The impact of heartbeats on startle

Hartmut Schaechinger¹, Lilly Linder¹, Terry
Blumenthal², & Wolf Langewitz¹

¹*University Hospital Basel*, ²*Wake Forest University*

**67. Physiological and emotional responses to
violent video playing**

Wade R. Elmore, Penny M. Ayers, & Diane
L. Filion

University of Missouri, Kansas City

**68. The effects of modified autogenic training
on sensorimotor gating**

Jake Nelson, Albert Poje, Kristen Keune,
Suzanne Petren, & Diane L. Filion

University of Missouri, Kansas City

**69. Effect of extroversion on emotional modulation
of startle**

Suzanne Petren, Amanda L. Stever, & Diane L. Filion

University of Missouri, Kansas City

70. Practice improves motor imagery ability

Catherine Rush Thompson & Diane L. Filion

University of Missouri, Kansas City

71. The effects of background noise and prepulse parameters on prepulse inhibition (PPI) of the acoustic startle eyeblink response

Albert Poje, Diane L. Filion, & Steven Evans

University of Missouri, Kansas City

72. The effects of predictability and controllability of aversive shocks on cortical activities and cardiac responses to warning signals and irrelevant tones

Mitsuo Ishida

Aichi Gakuin University

73. Cerebral asymmetries in global/local processing depend on response-compatibility: An ERP study

Peter Malinowski¹, Ronald Hübner², Andreas Keil², & Thomas Gruber¹

¹*University of Liverpool*, ²*University of Konstanz*

74. Modulation of Induced Gamma Band Responses in a paired associate learning task in human EEG

Thomas Gruber¹, Andreas Keil², Peter Malinowski¹, & Matthias M. Müller¹

¹*University of Liverpool*, ²*University of Konstanz*

75. Vagal tone in Generalized Anxiety Disorder before and after psychotherapy

Alissa Yamasaki, Desmond Oathes, William J. Ray, & Thomas D. Borkovec

The Pennsylvania State University

76. Error related negativity (ERN): Error vs. conflict generated?

John J. Curtin & Daniel Green

University of Wisconsin, Madison

77. Brain potential correlates of the latent externalizing dimension of psychopathology

Christopher J. Patrick, William G. Iacono,
Edward Bernat, Stephen M. Malone, Robert
F. Krueger, & Matt McGue
University of Minnesota

78. ERP concomitants of startle blink responses

Edward Bernat, Christopher J. Patrick,
Stephen Benning, & Christine Amrhein
University of Minnesota

**79. Affective modulation of blink startle and
post-auricular reflexes to noise probes**

Stephen Benning¹, Brian Hicks¹, Dan
Blonigen¹, Alan R. Lang², & Christopher J.
Patrick¹
¹*University of Minnesota*, ²*Florida State University*

**80. Quantification and reliability of startle
habituation and overall reactivity**

Steven D. LaRowe¹ & Christopher J. Patrick²
¹*Florida State University*, ²*University of Minnesota*

**81. The affective priming of aggressive behavior:
Phasic and tonic emotional effects**

Edelyn Verona¹, Christopher J. Patrick², &
Alan R. Lang³
¹*Kent State University*, ²*University of Minnesota*,
³*Florida State University*

**82. A new method for high-resolution sleep
movement recording**

Steven H. Woodward, Ned J. Arsenault,
Lorraine P. Stewart, & Wendy K. Stegman
*National Center for PTSD & Veterans Affairs
Palo Alto Health Care System*

**83. Modulation of the human nociceptive flex-
ion reflex**

Louisa Edwards, Christopher Ring, David
McIntyre, & Douglas Carroll
University of Birmingham

**84. A computerised system for stimulating
human carotid baroreceptors**

David McIntyre, Steve Allen, & Christopher
Ring
University of Birmingham

85. Effects of cold, mental, and exercise stress

on hemoconcentration: Intertask consistency

Simon L. Bacon¹, Stephen M. Patterson²,
Christopher Ring¹, Gonneke H. M.
Willemsen¹, & Douglas Carroll¹

¹*University of Birmingham*, ²*Ohio University*

86. Nociceptive flexion reflex thresholds are elevated by naturally occurring arterial baroreceptor stimulation

Louisa Edwards, Christopher Ring, David
McIntyre, & Douglas Carroll

University of Birmingham

87. Effects of gender and coping style on subjective pain and nociceptive reflex thresholds

Christopher R. France, Janis L. France,
Shannon A. Froese, & Jesse C. Stewart

Ohio University

88. Facial EMG analysis of the expression of specific emotions in asthmatics and healthy controls

Bernhard Dahme¹, Thomas Ritz², Miriam
Thöns¹, & Saskia Fahrenkrug¹

¹*University of Hamburg*, ²*Stanford University*

89. Airway response of healthy and asthmatic individuals to affective picture viewing: A special role for disgust and the upper airways?

Thomas Ritz¹, Miriam Thoens², Saskia
Fahrenkrug², & Bernhard Dahme²

¹*Stanford University*, ²*University of Hamburg*

90. Hemispheric and gender differences in mental rotation: Evidence from high-density event-related potentials

Neel S. Singhal & Geoffrey F. Potts

Rice University

91. Looking for the neural correlates of “hot” and “cold” emotions: A PET study

Alexandre Schaefer¹, Fabienne Collette²,
Martial Van der Linden^{2,3}, Pierre Philippot¹,
Steven Laureys², Guy Delfiore², Christian
Degueldre², Pierre Maquet², André Luxen², &
Eric Salmon²

¹*University of Louvain*, ²*University of Liège*,

³*University of Geneva*

- 92. Gender and age differences in heart rate changes associated with micro-arousals**
Nadia Gosselin^{1, 2}, Martin Michaud², & Jacques Montplaisir²
¹Centre d'Étude du Sommeil et des Rythmes Biologiques, ²Université de Montréal
- 93. Self-regulation of slow cortical potentials (SCP) and functional magnetic resonance imaging (fMRI)**
Niels Birbaumer^{1, 2}, Ute Strehl¹, Ralf Veit¹, Nicola Neumann¹, & Jasper Brener²
¹University of Tübingen, ²University of Padova
- 94. Brain activity and the perception of emotion**
Silke Anders, Martin Lotze, Michael Erb, Wolfgang Grodd, & Niels Birbaumer
University of Tübingen
- 95. Error processing in OC college students**
Greg Hajcak, Nicole McDonald, & Robert F. Simons
University of Delaware
- 96. The human startle reflex, pons and the cerebellum: A PET study**
Magne Arve Flaten¹, Anna Pissiota², Orjan Frans², Mats Fredrikson², Bengt Laangstrom³
¹University of Tromsø, ²Uppsala University, ³Uppsala University Hospital
- 97. Threatening picture facilitated the startle reflex at short stimulus-onset asynchronies**
Aake Elden & Magne A. Flaten
University of Tromsø
- 98. Effects of caffeine, caffeine-associated stimuli, and caffeine-related information on physiological and psychological arousal**
Magne Arve Flaten¹, Anita Mikalsen¹, Baard Bertelsen¹, & Terry D. Blumenthal²
¹University of Tromsø, ²Wake Forest University
- 99. Processing of simple visual stimuli facilitates the startle reflex at short stimulus-onset asynchronies**
Aake Elden, Bruno Laeng, & Magne A. Flaten
University of Tromsø

- 100. Physiological correlates of emotional dismissiveness during the Adult Attachment Interview: Generalizability across sex and ethnic groupings**
Glenn Roisman¹ & Jeanne L. Tsai²
¹University of Minnesota, ²Stanford University
- 101. Cultural differences in the relationship between physiological responding and facial expression during negative emotion**
Jeanne L. Tsai¹, Yulia Chentsova-Dutton¹, & Liliana Freire-Bebeau²
¹Stanford University, ²University of Minnesota
- 102. Discriminating Conduct Disorder from ADHD through concurrent assessment of multiple autonomic states**
Theodore P. Beauchaine¹ & Edward S. Katkin²
¹University of Washington, ²State University of New York, Stony Brook
- 103. The impact of abbreviated progressive muscle relaxation on salivary IgA and salivary cortisol**
Laura A. Pawlow, Gary E. Jones, Carol L. O'Brien, Brandon A. Ally, & C. Lea Eubanks
University of Southern Mississippi
- 104. Categorical representation in the human cortex — neuromagnetic evidence**
Andreas Löw¹, Annette Gomolla¹, Thomas Elbert¹, Rudolf Cohen¹, Brigitte Rockstroh¹, & Shlomo Bentin²
¹University of Konstanz, ²Hebrew University of Jerusalem
- 105. A comparison of parameters of electrodermal responding in an oddball procedure**
Elizabeth Mezzacappa, Edward S. Katkin, & David V. Cross
State University of New York, Stony Brook
- 106. A comparison of parameters of electrodermal responding in a cross-modality matching magnitude estimation task**
Edward S. Katkin, David V. Cross, & Elizabeth Mezzacappa
State University of New York, Stony Brook

107. Sensory gating of middle latency AEPs during REM sleep

Michael A. Kisley, Emily Robbins, Ryan D. Paterson, & Robert Freedman
University of Colorado

108. Trait and state aspects of P300 in schizophrenia: A prospective study

Monica Bicu, M. Laporta, J. Messier, & J. B. Debruille
McGill University

109. Event-related potentials and facial features

Allen Azizian, Alex Dimitriu, Joanne Pierre-Louis, & Nancy K. Squires
State University of New York, Stony Brook

110. Amygdalar activation during acquisition of aversive conditioning is modulated by stimulus contingencies: An event-related fMRI study

Diego Pizzagalli, Hillary S. Schaefer, Andrew M. Hendrick, Kathryn A. Horras, Alexander J. Shackman, Michael J. Anderle, Adrian J. C. Pederson, Aureliu Lavric, Issidoros Sarinopoulos, Rongyan Zhang, & Richard J. Davidson
University of Wisconsin, Madison

111. The effects of pharmacologically manipulated cortisol levels on memory for emotional and neutral information

Heather C. Abercrombie, Marchell E. Thurow, Melissa A. Rosenkranz, Ned H. Kalin, & Richard J. Davidson
University of Wisconsin, Madison

112. The effects of context on HR, RSA, PEP and negative affect in toddlers

Kristin A. Buss^{1,2}, Richard J. Davidson², & H. Hill Goldsmith²
¹*University of Missouri*, ²*University of Wisconsin, Madison*

113. Prefrontal EEG asymmetry and startle recovery predict immune response to influenza vaccine

M. Rosenkranz¹, D. Jackson¹, I. Dolski¹, K. Dalton¹, C. Ryff¹, B. Singer², & R. J. Davidson¹

¹*University of Wisconsin, Madison*, ²*Princeton University*

114. Baseline frontal EEG asymmetry predicts post-stimulus, but not stimulus-associated startle magnitude in response to unpleasant pictures

Daren C. Jackson, Corrina Mueller, Isa Dolski, Kim Dalton, Carol Ryff, Burt Singer, & Richard J. Davidson
University of Wisconsin, Madison

115. Alteration of EEG activity and the acoustic startle response during breastfeeding

Alexander J. Skolnick, Eric E. Nelson, & Richard J. Davidson
University of Wisconsin, Madison
